HONDA

High performance technology requires unique, motorsport inspired features such as brake cooling vents, aerodynamic rear wing, lightweight aluminium vented bonnet and centre mounted triple outlet exhaust.

BORN TO PERFORM

Underneath the sculpted bonnet lies a two litre, four cylinder VTEC TURBO engine which develops a maximum power output of 320PS and 400Nm of torque. It's no surprise to discover this gives the Type R the ability to sprint from 0-100km/h in 5.8 seconds and achieve 272km/h top speed (where conditions allow).

All this power is fed through a smooth and precise six-speed manual gearbox which is optimised by a rev match control system to ensure slick, intuitive gear changes. The final drive is transmitted through an exceptionally responsive helical limited-slip differential to further enhance the performance character.

The ultimate performance test is of course on the track. Not any track, but the iconic Nürburgring, where we pushed the new Type R to the limit. It responded with distinction, slicing almost 7 seconds from its predecessor's time.
